

Animal stress solution

**A natural
weaning
protection**

Sweet palatability

Fresh taste

Milk replacer

Promoting health

Broad protection

Intensive aroma

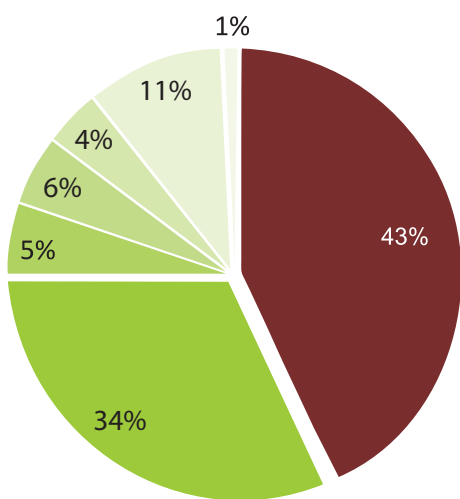

Cost effective

CARANI®, is an ingredient for animal feed, obtained from the pulp of the carob bean, its content of sugars is very high (40- 45%), being mainly used as an ingredient in animal feed due to the properties, as a milk replacer, good palatability, improves digestibility and its nutritional value, flavour and anti-diarrhoea properties.

CARANI® contains astringent substances (tannins), which prevent piglet diarrhoea, with a positive influence on the inner of the combination of the very specific sugar composition promotes the growth of digestive bacteria, without altering the tissue's cellular vitality, avoiding own mucous exudation and secretion, protecting it from the provoked irritation externally as well as internally.

These properties explain CARANI's excellent behaviour in piglets diet after weaning, as well as formulation for weaning calves, ruminants, dairy cows, poultry and petfood.

Dosage varies from 5 to 10%.

Analysis

- Total sugars ~43%
 - Other Carbohydrates ~34%
 - Ash ~5%
 - Moisture ~6%
 - protein ~4%
 - Crude fibre ~11%
 - Crude fat ~1%
- Gross energy value: ~3100 Kcal
 Granulometry 96%<105µ
 pH 5-6

Microbiological Specification

Aerobic max	10000/gr
E.Coli	Negative
Salmonelle	Negative
Aflatoxine	Negative

Package: 25Kg Multilayer paperbag, inner polytilene bag.

Self life: 18 months fom manufacturer date, to keep in dry and good condition place.
